

AcuTech Recruiting Security Managers and Consultants

AcuTech Consulting Group, a premier provider of security and safety management services since 1994, is expanding worldwide and seeking highly qualified managers, consultants and contract consultants for positions in our Houston (TX), San Francisco (CA), Princeton (NJ), McLean (VA), and Dubai (UAE) offices, and at other US and international project locations. Virtual offices considered. Join a highly respected team of experts on higher level projects for many of the world's largest corporations and governments. Please see our website at www.acutech-consulting.com.

AcuTech Consulting Group is recognized globally for chemical and energy security services. AcuTech's services include a full scope of security services for industry and government in homeland security including chemical and energy security management. AcuTech consultants provide threat identification and analysis, vulnerability and risk assessment, development of security management systems, and assistance with selection of appropriate countermeasures. We also offer training seminars on these topics and software for security vulnerability analysis.

We have developed security guidelines for key trade organizations and Government agencies (CCPS, API, ACC, DHS), as well as taught seminars and conducted vulnerability assessments for major companies. We are a leading provider of CFATS services. We approach the issue of chemical facility security from a risk-based, systematic approach and understand corporate risk management objectives. Our clients represent leading global chemical, petroleum, petrochemical, pharmaceutical, pipeline, and manufacturing companies as well as the US and foreign governments.

Job responsibilities include:

- Threat analysis
- Conducting Security Vulnerability Analyses of critical infrastructure
- Providing security expertise for improving security across the enterprise
- Developing chemical and energy security management systems
- Conducting audits of security management systems
- Regulatory support including CFATS, MTSA, DOT compliance assistance
- Specifying security countermeasures

Positions include:

- **Security Managers**— an opportunity to develop and lead consulting teams with the backing of AcuTech's leading market position, technology and strategic leadership. Key positions include Chief Security Officer, Regional Security Advisor, and Security Practice Leaders.
- **Security Consultants**—consultants needed for the following services:
 - SVA team leaders for vulnerability assessment of critical infrastructure projects
 - Technical security consultants for evaluating, recommending, and specifying security countermeasures

- Management systems consultants including security management program development, auditing, change management, systems implementation, organizational culture and benchmarking
- Cyber security expertise such as industrial control systems and SCADA vulnerability analysis and management
- Training specialists with a successful record of providing training on security management and regulatory compliance
- Regulatory compliance consultants for CFATS, MTSA, and related developments
- Homeland security specialists including emergency response, resilience, and infrastructure protection consultants
- Threat analysts to prepare threat assessments and monitor ongoing threats

To meet our current project demands and future growth plans, we are looking to fill many positions of various levels of experience and qualifications in all of our locations. We are seeking individuals with the following types of qualifications preferably:

- BS/MS (engineering or other technical degree) and/or related homeland security experience in security vulnerability analysis, threat analysis, security policy development, security systems design and specification;
- Minimum 5+ years of related experience, preferably in a consulting, Government, or industry environment related to our core focus;
- Security experience in the chemical, petroleum, energy, nuclear or other sectors;
- Experience in developing, writing, and implementing facility security plans, procedures, design specifications,
- Demonstrated ability to manage complex assignments and work independently or in groups;
- Demonstrated ability to recognize hazards, drive continual improvement, and promote practical alternatives for risk reduction and risk control measures;
- Demonstrated ability or willingness to develop consulting business, including developing proposals and making presentations;
- Self-motivated, strong leadership and organizational skills;
- Excellent English verbal and written communication skills, interpersonal skills, and ability to interface at all levels;
- Excellent customer service skills, presentation skills;
- Highly proficient in MS Office skills (Word, PowerPoint, Excel);
- Strong analytical, problem-solving, and facilitation skills and a consultative approach in supporting customer projects;
- Working knowledge of U.S. and international security regulations, codes, rules, standards (DHS CFATS, MTSA, DOT, IMO, etc.)
- Professional certification (CPP) a plus.
- Ability to obtain security clearances.

These positions offer an excellent opportunity for personal and professional growth. AcuTech provides a competitive package of benefits including stock options. Salary is based on experience and qualifications. Please email resume, salary history and preferred office location(s) to our recruiting manager at recruiting@acutech-consulting.com.
